

## Services offered for foreign capital investments

Turkey's need for capital investment injection and the effective role the foreign investment plays in Turkish economy make the services offered to foreign investors...

Turkey's need for capital investment injection and the effective role the foreign investment plays in Turkish economy make the services offered to foreign investors all the more important. When the complex financial regulations structure of our country is compared with other countries, it becomes apparent that an experienced and knowledgeable team is needed.

Our company offers accounting services and support to foreign investors from conception to execution with a staff that is expert on both domestic and foreign investment regulations and procedures.

Our experience has shown that the ability to foresee future legal obligations based on the era the investment is made is one of the most important details foreign investors value. Armed with this knowledge, our consultants examine legal and financial environment as a whole and offer feasibility reports to our clients based on forecasted legal changes.

Our company also offers legal assistance in incorporation of foreign companies or branches in Turkey, such as preparation of all licensing forms and preparations of reports necessary to declare at the Office of Foreign Capital.
